

Corporate Profile

- » International petroleum and natural gas E&P Company
- » Listed Tier 1 on the Toronto Venture Stock Exchange
- » Five producing projects in Alberta, Canada
- » International Cooperative Agreements in place
- » New international focus:
China Oil, China CBM and China EnviroEnergy

International Focus

- » International cooperative agreements with:
 - Enviro Energy International Holdings Limited
 - Alberta Research Council Inc.

Competitive Advantage

Petromin is leading the way in technologically innovative methods designed to significantly improve reserves of existing oil pools (EOR) and to enhance the recovery of coal bed methane (ECBM) while significantly minimizing green house gas (GHG) emissions. By applying the latest **CO2 Geological Sequestration Technology**, Petromin aims to implement projects that enhance oil recovery and extract coal bed methane while significantly lowering CO2 green house gas emissions in China by 2009.

Revenue

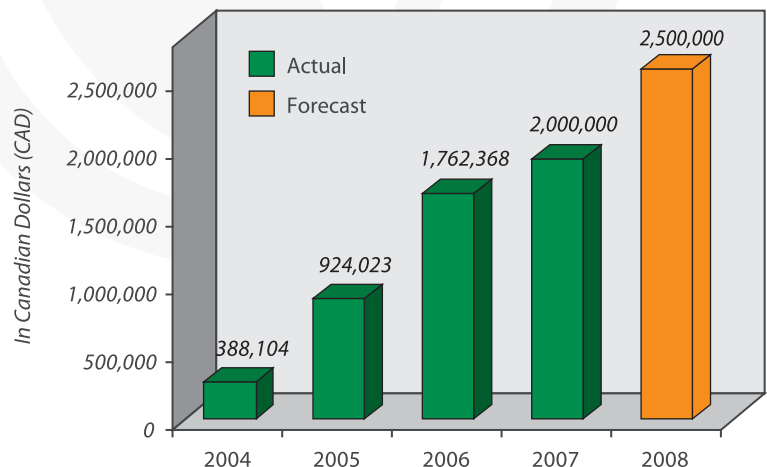

Alberta,
Canada

Conventional Energy

Petromin owns interest in five oil and gas properties in central Alberta situated along the Western Canada Sedimentary Basin – the most productive hydrocarbon area in Canada. In 2003, the Western Sedimentary Basin accounted for about 87 per cent of Canada's crude oil and 97 per cent of natural gas production. In total the Company's combined net production rate is at 380 (BOE) barrels of oil per day.

Petromin's Projects: Frog Lake, Calmar, Gilby, Morningside, Redwater
